anti-rat and pest control, there is sufficient placement to implement the storage area of the deratized container Venue.

3 Requirements

3.1
The effect of fumigation and deratization should reach 100%.

3.2
The recommended drugs to be used by the General Administration of Quality Supervision, Inspection and Quarantine should be selected.

3.3
In order to prevent live rats and cockroaches from escaping, fumigation of containers and their goods should be carried out before unpacking.

3.4
When using the container's own space for fumigation and deratization, it should be implemented at a special site for quarantine treatment, using other places to fumigate or remove the rat.

When the box and its cargo are detoxified with bait, they should be implemented in a closed place.

3.5
The deratization process should avoid causing human and animal poisoning and other safety incidents to prevent damage to the inbound and outbound containers and their cargo.

4 Objects

Deportation shall be carried out if the entry and exit containers and their goods are in one of the following circumstances.

--- was judged to be suspected of plague or plague;

--- From the plague area;

---Loading waste paper and textile waste;

--- After the quarantine inspection found the rat sign.
