3 Terms and definitions

The following terms and definitions apply to this standard.

Infectious diseases caused by hepatitis viruses (mainly including hepatitis A, B, C, D and E).

4 Test object

The test subjects for viral hepatitis in the port include.

---In and out medical examination personnel;

---Practitioners in public places and catering industry at border ports;

--- Apply for inspection personnel.

5.1.1 Verification of specimens

The standard verification work focuses on the following aspects.

---Verify the conformity of the test sheet with the specimen;

---Check and record the presence or absence of hemolysis and jaundice;

--- Check the sample container for damage and omission.

5.1.2 Sample preparation

The serum was allowed to stand for 1 h, centrifuged at 3000 r/min for 15 min, and the serum was aspirated for testing.

5.1.3 Serum preservation

The serum after centrifugation can be stored in the refrigerator at 2 ° C ~ 8 ° C if it is tested within three days. It can be stored below -20 ° C in the short term.

Store below -70 °C.
