Foreword

SN/T 1429 "Import and Export Information Technology Equipment Inspection Regulations" is divided into the following sections.

- Part 1. General requirements
- Part 2. Desktop Computer
- Part 3. Power transformers, power supply units and similar equipment
- Part 4. Digital broadband wireless access network terminals
- Part 5. Portable computers
- Part 6. Microscopic office equipment
- Part 7. Power adapters for information technology equipment
- Part 8. Walkie-talkie
- Part 9. Sales terminal this part is the second part of SN/T 1429.

This part is proposed and managed by the National Certification and Accreditation Administration.

This section drafted by. Zhejiang Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China.

1 Scope

This part of SN/T 1429 specifies the sampling, inspection and inspection results of the import and export desktop computers.

This section applies to the inspection of import and export desktop computers.

2 Normative references

The provisions in the following documents become the provisions of this part by reference to this part of SN/T 1429. Any dated reference document, all subsequent amendments (not including errata content) or revisions do not apply to this section, however, parties that have reached an agreement under this section are encouraged.

Study whether the latest versions of these files are available. For undated references, the latest edition applies to this section.

GB/T 2828.1. Sampling and sampling procedures - Part 1 . Batch-to-batch sampling plan searched by the acceptance quality limit (AQL) (GB/T 2828.1-2003, ISO 2859-1.:1999, IDT)
GB 4943 Security of information technology equipment (GB 4943-2001, eqv IEC 60950.:1999) GB/T 9813 Microcomputer General Specification

3 Terms and definitions

The following terms and definitions apply to this section.

The unit product of the same model and produced under the same production conditions for the purpose of sampling inspection is called inspection batch, referred to as batch.

4.1 Inspection method

The test is divided into a type test and a settlement test.

4.2.1 Sampling conditions

The batch submitted for sampling shall have a valid type test report and a factory inspection certificate.

4.2.2.1 Sampling plan and inspection level

The settlement inspection adopts GB/T 2828.1 normal inspection once sampling plan, and the inspection level is special inspection level S-1.

4.2.2.2 Receive quality limit AQL value

Consignment inspection non-conforming products are classified into Class A, Class B and Class C.

--- Class A non-conforming product. not allowed;

--- Class B non-conforming product. AQL=1.5;

---C non-conforming product. AQL=4.0.

4.2.3 Sampling method

Samples were randomly drawn from the batch.
