What this standard covers

This standard specifies the use of dynamic MR combined statistical tracking and monitoring technology, the laboratory measurement system stability, precision, and continuous monitoring of performance deviations laboratory internal quality assessment methods. This standard applies to laboratory testing methods and with the correction control, does not apply to the different instruments on the same level of analytical methods for measuring the characteristics of the comparison between multiple measurement system.

Document data

International classification (ICS): 71.040.10.

Chinese classification (CCS): N60.

Estimated length of the Chinese original: 25,272 words.
