What this standard covers

This standard specifies the solvent-based coatings BTEX (benzene, toluene, xylene) and a diisocyanate monomer (toluene diisocyanate, the diisocyanate, isophorone diisocyanate and diphenylmethane diisocyanate) content by gas chromatography detection methods. This standard applies to solvent-based coatings BTEX diisocyanate monomer and determination.

Document data

International classification (ICS): 87.040.

Chinese classification (CCS): G51.

Estimated length of the Chinese original: 8,892 words.
