- 3 Terms and definitions

Foreword

SN/T 1733 "Non-Genuine Steel Inspection and Identification Regulations" is divided into 11 parts.

- Part 1. Slab;
- Part 2. color coated board;
- Part 3. Billet/round billet;
- Part 4. Wire rod;
- Part 5. Profiles;
- Part 6. Pipe;
- Part 7. Stainless steel plate (belt);
- Part 8. Tin-plated steel sheet;
- Part 9. Galvanized steel sheets and strips;
- Part 10. Cold rolled steel sheets and strips;
- Part 11. Hot rolled steel sheets and strips.

This part is the third part of SN/T 1733.

Appendix A of this section is a normative appendix, and Appendix B is an informative appendix.

This part is proposed and managed by the National Certification and Accreditation Administration.

This section drafted by. Jiangsu Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China, Guangdong Entry-Exit Inspection and Quarantine Bureau, Shandong Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China, Shenzhen Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China, Shanghai Entry-Exit Inspection and Quarantine Bureau, Zhejiang Entry-Exit Inspection and

Quarantine Bureau of the People's Republic of China, and Tianjin Entry-Exit Inspection Epidemic situation.

1 Scope

This section specifies the definition, technical requirements, inspection and appraisal, quality level assessment and test results of non-genuine billet/round billet.

This section applies to the inspection and identification of non-genuine billet/round billet and grade 1 residual billet/round billet.

2 Normative references

The terms in the following documents are incorporated by reference in this part of SN/T 1733 as part of this section. For dated references, all subsequent amendments (not including errata content) or revisions do not apply to this section, however, an agreement is encouraged under this section.

The parties are studying whether the latest version of these documents can be used. For undated references, the latest edition applies to this section.

GB/T 702 hot rolled square steel, round steel size, shape, weight and tolerance (GB/T 702-2004, ISO 1035-1 ~ 1035-2.1980, MOD ISO 1035-4.1982, MOD) GB 4223 scrap steel (GB 4223-2004, JIS2401. 1979, NEQ) YB/T 001 blank size, shape, weight and tolerance YB/T 002 Hot rolled billet size, shape, weight and tolerance YB/T 004 technical conditions for initial rolling and billet YB/T.2011 continuous cast steel billet and rectangular billet YB/T 5221 alloy structural steel round billet YB/T 5222 high quality carbon steel round billet

3 Terms and definitions

GB/T 702, GB 4223, YB/T 001, YB/T 002, YB/T 004, YB/T.2011, YB/T 5221, YB/T 5222 were established and the following terms and definitions apply to this section.

Refers to the billet/round billet specified in the specifications of the country of production or the contract of the trade contract (see Appendix A) for specifications, appearance and quality.

Trade is accustomed to be called "secondary billet/round billet secondary steel billets and round billets", including equal billet/round Billet, etc.

It means that some or all of the specifications, appearance, quality, etc. do not meet the requirements of the corresponding genuine standard, but the product still retains the original billet/round billet.

It means that the specifications, appearance and quality of the single piece meet the requirements of the original standard, but the whole batch of goods exists in various

grades, multiple specifications, multiple materials, and one piece.

Billet/round billet with characteristics such as large weight difference.

Refers to waste billet/round billet products such as scraps that have serious defects that cannot be used for their original purposes, or that can only be used for smelting and recycling.
