Foreword

SN/T 1891 "Importers microwave food containers and packaging materials hygiene standards" is divided into 13 parts.

- Part 1. polypropylene molded article;
- Part 2. melamine products;
- Part 3. polyethylene products;
- Part 4. PVC moldings;
- Part 5. polystyrene products;
- Part 6. glass products;
- Part 7. vinylidene chloride - vinyl chloride copolymer resin;
- Part 8. polycarbonate resin;
- Part 9. polyethylene terephthalate resin;
- Part 10. polystyrene resin;
- Part 11. Polypropylene resin;
- Part 12. polyethylene terephthalate molded article;
- Part 13. polyvinyl chloride resin.

This section SN/T 1891 Part 6.

This section proposed and managed by the National Certification and Accreditation Administration Committee.

This section is drafted. Tianjin People's Republic of China Exit Inspection and Quarantine.

1 Scope

SN/T 1891 This section specifies hygiene requirements and export microwave food container, glass products and test methods.

This section applies to food and beverages containing Importers microwave glass.

2 Normative references

The following documents contain provisions which, through reference SN/T 1891 to the present, constitute provisions of this section. For dated reference documents Member, all subsequent amendments (not including errata content) or revisions do not apply to this section, however, encouraged to reach under this section Parties to research agreement to use the latest versions of these documents. For undated reference documents, the latest versions apply to this section.

GB/T 3534 ceramic ware testing methods for lead or cadmium release GB/T 4547 Glass containers - Thermal shock resistance and thermal shock endurance - Test methods GB/T 4548.2 water resistance of the interior surface of glass products glass container was determined by flame spectrometry and classification GB/5009.11 Determination of total arsenic in food T and inorganic arsenic Analysis Method GB/T 5009.63 enamel for food containers health standards GB/T 6582 Test methods and classification of glass particles at 98 °C water resistance Within the GB/T 15726 glassware stress testing methods Determination of GB/T 16920 glass average linear thermal expansion coefficient SN/T 1891.1-2007 Importers microwave food containers and packaging materials hygiene standards - Part 1. polypropylene molded article

3 Terms and Definitions

The following terms and definitions apply to SN/T 1891 to the present section.

With a heating system for the 2450MHz frequency band of electromagnetic waves.

4.1 Appearance

4.1.1

The glass should be smooth, no bubbles, inclusions, cracks and stains and so on.

4.1.2

Glass Products sudden no mouth opening, mouth trap, no distortion products sidewall, projections and other bottom products bottomless.

4.1.3

commissure should be intact, no seam error, split seam and seam rough like.

4.1.4

If the coating, the coating surface should be no sagging, peeling, cracking, holes, bubbles and the like.

4.1.5

glassware and cover should match.

4.1.6

glass should be able to be placed is stable.

4.2 Microwave high-frequency heating

It appears to be no spark, no defects and other abnormalities.

4.3 Physical indicators

Physical and chemical indicators should be consistent with the requirements of Table 1.
