### What this standard covers

This standard specifies the eight kinds of food of animal origin nitroimidazole residues, two kinds of metabolites by liquid chromatography mass spectrometry/mass spectrometry. This standard applies to beef, pork, poultry organizations and their liver, kidneys, milk and dairy products, honey, aquatic products: 4 nitro- imidazole, isopropyl metronidazole, dimetridazole, ronidazole, A metronidazole, metronidazole chlorine imidazole, dimetridazole, benzene, imidazole nitrate residues and their metabolites MNZOH (metronidazole metabolites), HMMNI-H (dimetridazole, ronidazole metabolic matter) determination and confirmation.

### Document data

International classification (ICS): 67.020.

Chinese classification (CCS): C53.

Estimated length of the Chinese original: 22,222 words.
