### What this standard covers

This standard specifies the requirements for PCR sample preparation, the quality and volume is suitable for obtaining qualitative PCR assay samples or nucleic acids. This standard applies to PCR detection of pathogens in food, if necessary, can also be used for feed, agricultural/environmental samples by PCR.

### Document data

Chinese classification (CCS): X04.

Estimated length of the Chinese original: 20,227 words.

Adopted international standard: ISO 20837-2006, IDT.
