What this standard covers

This standard specifies the inductively coupled plasma- atomic emission spectroscopy (ICP-AES), inductively coupled plasma mass spectrometry (ICP-MS) and flame atomic absorption spectrometry (FAAS) determination of gypsum and gypsum products in the strontium content approach. This standard applies to gypsum and gypsum products in the detection of strontium content.

Document data

International classification (ICS): 91.100.10.

Chinese classification (CCS): Q62.

Estimated length of the Chinese original: 12,119 words.
