What this standard covers

This standard specifies the coal tar in calcium, iron, sodium, nickel, silicon, titanium, vanadium determination. This standard applies to coal tar, petroleum coke and calcined petroleum coke, calcium, iron, sodium, nickel, silicon, titanium, vanadium determination. This standard applies only to ash content of less than 1% of the sample.

Document data

International classification (ICS): 75.140.

Chinese classification (CCS): E43.

Estimated length of the Chinese original: 6,660 words.
