What this standard covers

This standard specifies the inductively coupled plasma mass spectrometry (ICP-MS) determination of polymer components in electrical and electronic products organotin screening methods. This standard applies to electrical and electronic products organotin polymer component selection. Determination of organotin lower limit (As tin) is 0. 5mg/kg.

Document data

International classification (ICS): 31.020.

Chinese classification (CCS): L04.

Estimated length of the Chinese original: 6,675 words.
