What this standard covers

This standard specifies the determination of arsenic in iron ore, mercury, cadmium, lead, bismuth content by atomic fluorescence spectroscopy. This standard applies to the determination of natural iron ore, iron ore concentrate, and agglomeration and sintering products of arsenic, mercury, cadmium, lead, bismuth content.

Document data

International classification (ICS): 73.060.10.

Chinese classification (CCS): D31.

Estimated length of the Chinese original: 11,196 words.
