What this standard covers

This standard specifies the tungsten products in Ni, Fe, Co, Mn and other elements by inductively coupled plasma atomic emission spectrometric method. This standard applies to tungsten products in the determination of the four elements, measurement ranges are shown in Table 1.

Document data

International classification (ICS): 77.150.99.

Chinese classification (CCS): H63.

Estimated length of the Chinese original: 9,975 words.
