What this standard covers

This standard specifies the import and export of high-purity graphite sulfur X-ray fluorescence spectrometry method. This standard applies to export high-purity graphite (fixed carbon content of greater than 98%) of the sulfur content, the determination of elements ranging from 0. 01% to 0. 1% (mass fraction).

Document data

Chinese classification (CCS): Q51.

Estimated length of the Chinese original: 10,137 words.
