What this standard covers

This standard specifies the photoemission spectra of folded square remove magnesium and magnesium alloys. This standard applies to metallic magnesium and magnesium alloy die-cast specimens, castings, plate, specimens deformed extrusion or other form or shape, measuring elements and range in Table 1.

Document data

International classification (ICS): 77.120.60.

Chinese classification (CCS): H12.

Estimated length of the Chinese original: 10,116 words.

Adopted international standard: ASTM B954-2007, NEQ.
