What this standard covers

This standard specifies the food simulants bisphenol A-diglycidyl ether (bisphenol A diglycidyl ether, referred BADGE), derivatives of bisphenol F-diglycidyl ether (bisphenol F diglycidyl ether, referred BFDGE) and its hydroxy and chlorinated matter: the measurement method. This standard applies to food simulants water, 3% (mass concentration) acetic acid, 10% (volume fraction) ethanol solution and olive oil small ADGE, BFDGE determination and its hydroxy and chlorinated derivatives. Determination of food simulant small BADGE and its derivatives low limit 0.05µg/mL, measured BFDGE lower limit of its derivatives 0.1µg/mL.

Document data

International classification (ICS): 67.250.

Chinese classification (CCS): X08.

Estimated length of the Chinese original: 18,124 words.

Adopted international standard: EN 15136-2006, IDT.
