What this standard covers

This standard provides high-performance liquid chromatographic method of polymer materials in contact with food the food simulants benzaldehyde. This standard applies to water, 3% (mass concentration) acetic acid, 105 (volume fraction) ethanol solution, determination of sunflower oil in four food simulants benzaldehyde content. Water, 3% (mass concentration) acetic acid, within the lower limit 0. 01mg L, sunflower oil was measured benzaldehyde measured 10% (volume fraction) ethanol solution of three water-based food simulants benzaldehyde/low limit 0. 1mg/kg.

Document data

International classification (ICS): 67.250.

Chinese classification (CCS): X08.

Estimated length of the Chinese original: 9,928 words.
