What this standard covers

This standard specifies the method for the determination of hot water or cold water extract dry matter content of paper or cardboard. This standard applies to the determination cooking or filtered water extracts of paper and paperboard used for food in the dry matter content. Measuring range: minimum limit is about 1000mg/kg. This corresponds to the amount extracted from a paper 100g/m² for 1 mg/dm², or extracted from the amount of 200g/m² cardboard for 2 mg/dm².

Document data

International classification (ICS): 67.250.

Chinese classification (CCS): X08.

Estimated length of the Chinese original: 7,769 words.

Adopted international standard: EN 920-2001, NEQ.
