What this standard covers

This standard specifies the differential scanning calorimetry plastic material oxidation induction time and oxidation induction temperature of Methods. This standard applies to the evaluation of the thermal stability of plastic raw materials modification.

Document data

International classification (ICS): 83.040.01.

Chinese classification (CCS): G31.

Estimated length of the Chinese original: 9,959 words.

Adopted international standard: ISO 11357-6-2008, NEQ.
