Foreword

SN/T 2988 "General requirements for professional textile import and export" is divided into two parts.

--- Part 1. Terminology;

--- Part 2. Laboratory technical specifications.

This section SN/T 2988 Part 2.

This section drafted in accordance with GB/T 1.1-2009 given rules.

This section proposed and managed by the National Certification and Accreditation Administration Committee.

Introduction

This section mainly to GB/T 27025-2008 "testing and calibration laboratories General requirements" as the basis, while for textiles Professional special requirements be written.

This section is intended to regulate, guide and help the textile specialized laboratories, to meet the GB/T 27025-2008 "testing and calibration experiments General requirements" room capacities and specific requirements of the professional and skilled operation and management, but does not include the operation of the laboratory shall comply with the regulations, and Safety requirements. When laboratory testing field also includes microbiological testing areas should be combined with the special requirements of the field of microbiology.

General technical requirements for professional textile import and export Part 2. Laboratory Technical Specifications

1 Scope

This section SN/T 2988 provisions textiles (not including textile raw materials) testing laboratories shall meet the general technical requirements, including humans Staff, equipment, reference material and important consumption items, test samples, test methods, quality control facilities and environmental factors control technology, and the results of the quality assurance requirements.

This section applies in textile sensory examination and physical and chemical testing laboratory projects. Other products testing laboratories can refer use.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version suitable for use herein Member. For undated references, the latest edition (including any amendments) applies to this document.

GB/T 6379.1 measurement methods and results of Accuracy (trueness and precision) - Part 1. General principles and definitions GB/T 15000.2 standard for the work of (2) The common terms and definitions GB/T 19000 Quality management systems Fundamentals and vocabulary

3 Terms and Definitions

GB/T 6379.1, GB/T 19000 and GB/T 15000.2 defined and the following terms and definitions apply to this document.

Textile Lab textilelaboratory Textile products subject to inspection or testing laboratories.

NOTE: Textile products include natural fiber and chemical fiber as the main raw material for industrial and daily use of yarns, fabrics, articles of clothing.

4 Technical Factors

Textile laboratory measurements determine the accuracy and reliability of the technical elements include but are not limited to, the following.

- personnel;
- equipment;
- Important reference material and consumables;
- Test sample;
- Detection method;
- Facilities and the environment;

--- Testing the quality assurance measures;

---Test Report.
