What this standard covers

This standard specifies the B-100 biodiesel fatty acid methyl esters in the determination of free and total glycerin Standard Test Method. This standard applies to gas chromatographic quantitative determination of B-100 biodiesel fatty acid methyl esters of free and total glycerin content. This standard measurement ranges: free glycerol was 0. 005% to 0. 05% (mass fraction), total glycerol 0. 05% to 0. 5% (mass fraction). This standard does not apply to laurel oil (such as coconut oil and palm kernel oil) vegetable oil fatty acid methyl esters obtained.

Document data

International classification (ICS): 75.160.

Chinese classification (CCS): E31.

Estimated length of the Chinese original: 10,119 words.

Adopted international standard: ASTM D6584-2008, IDT.
