What this standard covers

This standard specifies the polylactic acid polymer materials in food contact materials like total amount of lactic acid migration performance liquid chromatographic method. This standard applies to the polylactic acid resin total lactic acid in food simulants water migration testing. This standard limit of determination: 3mg/square decimeter.

Document data

International classification (ICS): 67.250.

Chinese classification (CCS): X08.

Estimated length of the Chinese original: 7,754 words.
