Foreword

SN/T 3079 "security technology products to prevent the import and export inspection procedures" consist of several components, which are expected structure.

- Part 1. security alarm equipment;
- Part 2. security alarm equipment Ultrasonic doppler probe;
- Part 3. security alarm equipment Microwave Doppler detectors;
- Part 4. security alarm device Active infrared intrusion detectors;
- Part 5. security alarm equipment Passive infrared detectors.
- Part 6. security alarm equipment microwave and passive infrared intrusion detectors;
- Part 7. security alarm equipment ultrasonic and passive infrared intrusion detectors;
- Part 8. security alarm equipment vibration intrusion detectors.
- Part 9. security alarm equipment Passive glass break detectors.

This section SN/T Section 13079 of.

This section drafted in accordance with GB/T 1.1-2009 given rules.

This section proposed and managed by the National Certification and Accreditation Administration Committee.

Introduction

"Importers and security technology to prevent product testing procedures - Part 1. security alarm device" security technology to prevent the import and export capacity Products --- security alarm equipment inspection work based on security technology to prevent the import and export of products --- security alarm equipment inspection from to guide and regulate the role.

With China's accession to the World Trade Organization (WTO) and the revised "People's

Republic of China Import and Export Commodity Inspection Law" Import and Export Commodity Inspection Test mode has undergone great changes, and changes in order to adapt to the situation, the state department in charge of inspection and quarantine inspection and quarantine standards organization established system.

This part belongs to the inspection and quarantine standards on the third floor --- categories of common standards, import and export provisions of the preventive security technology products --- Safety Full alarm equipment inspection General requirements.

Security technology products to prevent the import and export inspection procedures Part 1. security alarm equipment

1 Scope

SN/T 3079 provisions of this part of the security technology to prevent the import and export of goods --- security alarm equipment requirements, testing and determination.

This section applies to the financial, cultural, shops, homes, vehicles and other places use a variety of general and special preventive security technology products ---Import and export inspection security alarm equipment.

This section applies to preventive security technology products --- security alarm equipment products include intrusion detectors, burglar alarm controller production Products, automobile anti-theft alarm system and security safes (me) products.

Intrusion detectors range of products. Active infrared intrusion detectors, Passive infrared detectors, Microwave Doppler detectors, Microwave and passive infrared intrusion detector, vibration intrusion detectors, Passive glass break detectors, magnetic switch intrusion detectors, and said intrusion detectors integrated with other equipment products.

Burglar alarm control range of products. the implementation set the alert in intrusion alarm systems, de-alerting, judgment, testing, instructions, messages transmitted Police information and complete certain control functions of the device, including local alarm burglar alarm control, remote alarm burglar alarm controller, Wireless transmission burglar alarm control, anti-theft alarm and controller integrated with other equipment burglar alarm products.

Automobile anti-theft alarm system product range. set the alert status at the intrusion or theft of the vehicle behavior indicates that out of the system, including the market for in-use vehicles to install anti-theft alarm system on the vehicle, to the vehicle manufacturer for the vehicle at the factory installed Car anti-theft alarm system. It does not include a vehicle anti-theft device or system itself has.

Security safes (boxes) range of products. security safes, security safes, including enterprise security features and additional commitments other functions Energy security safes (boxes).
