Foreword

This standard was drafted in accordance with GB/T 1.1-2009 given rules.

This standard is proposed and managed by the National Certification and Accreditation Administration Committee.

This standard was drafted. People's Republic of China Hunan Entry-Exit Inspection and Quarantine of Guangxi People's Republic of China Bureau, People's Republic of China Jiangxi Exit Inspection and Quarantine.

Introduction

With the social development and technological progress, dangerous chemical species are also increasing, which covers safety regulations has become even more widespread in the country "List of Hazardous Chemicals" existing issued (State Production Safety Supervision Administration Announcement No. 1 of 2003) has more than 3800 kinds of different kinds Class of hazardous chemicals. Meanwhile, the United Nations "on the Recommendations on the Transport of Dangerous Goods Model Regulations" and "GHS Classification and standards Sign system "(GHS) for the transport of dangerous chemicals, packaging and labels and other relevant requirements, and hazardous chemical species given a clear regulation set. Explosives in accordance with the United Nations "on the Recommendations on the Transport of Dangerous Goods Model Regulations" are classified as Class 1 dangerous goods, including both Having a mass explosion hazard explosive substances, explosive substances have a risk of major and non-minimal risk of explosion. The State Council in 2011 March release of "dangerous chemical safety regulations" (State Council Decree 591) defined the inspection and quarantine departments are responsible for the import and export of hazardous Chemicals and their packaging implementation of the inspection. Import and export of dangerous chemicals "on the State Administration of Quality Supervision, Inspection and Quarantine February 29, 2012 released Products and their packaging inspection and regulatory issues related to notice "(No. 30, 2012 announcement) Article points out the import and export of hazardous chemicals and

packages Installed in accordance with the AQSIQ designated technical specifications, the standard requires the implementation of inspection and supervision, inspection and quarantine to ensure an effective work-related businesses Conduct, regulate the import and export of dangerous chemicals inspection procedures, the need to develop this standard.

This standard is used as the inspection of import and export of explosives common technical standards, can guide the inspectors in accordance with the State Administration of Quality Supervision, "Importers crisis Dangerous chemicals and packaging inspection and regulatory issues related to notice "(No. 30, 2012 announcement) requires dangerous chemicals and explosives for carrying out inspection Supervision.

The basic contents of this standard to determine the standards can guide workers the right to establish a comprehensive inspection of import and export of hazardous chemicals standard Research and technical elements, so standards to systematic, scientific, applicability and operability requirements.

Inspection of import and export of dangerous chemicals the basic requirements for explosives Warning. Use of this standard should take full advantage of the safety knowledge of explosives, relevant inspection and testing work experience. The standard no registration list all possible security issues, the user has the responsibility to use appropriate safety and health practices and to ensure compliance with national

1 Scope

This standard specifies the import and export of hazardous chemicals in explosives terms and definitions, requirements, testing, determination and disposal.

This standard applies to the import and export of hazardous chemicals in explosives testing. See Appendix A. explosives Directory
