Foreword

This standard was drafted in accordance with GB/T 1.1-2009 given rules.

This standard is proposed and managed by the National Certification and Accreditation Administration Committee.

This standard was drafted. People's Republic of China Beijing Entry-Exit Inspection and Quarantine Bureau, People's Republic of China Jiangsu Entry-Exit Inspection and Quarantine Bureau, People's Republic of China Anhui Entry-Exit Inspection and Quarantine of Guangxi People's Republic of China.

Introduction

With the social development and technological progress, dangerous chemical species will also be increased, which also covers safety regulations become more widespread, in my States in force "List of Hazardous Chemicals" (2002 edition) has more than 3800 kinds of different types of hazardous chemicals. Meanwhile, the United Nations "on the Recommendations Transport of Dangerous Goods Model Regulations "and" Globally Harmonized System of Classification and Labelling "for transport of dangerous chemicals, packaging and label Also have signed the relevant requirements, and hazardous chemical species given clearly defined. Oxidizer in accordance with the United Nations to "build on the Transport of Dangerous Goods Recommendation Model Regulations "classified as dangerous goods of Class 5.1, is a kind of common import and export of hazardous chemicals, including solid oxidant and Liquid oxidant. In March 2011 the State Council issued the "dangerous chemical safety regulations" (State Council Decree No. 591) a clear test Quarantine department is responsible for the import and export of hazardous chemicals and their packaging implementation of the inspection. State Administration of Quality Supervision, Inspection and Quarantine February 29, 2012 "Issued on the import and export of dangerous chemicals and packaging inspection and regulatory issues related to notice" (No. 30, 2012 announcement) Article noted Import and export of hazardous chemicals and their packaging in accordance with the AQSIQ designated technical

specifications, the standard requires the implementation of inspection and supervision, to ensure that the subject Inspection and quarantine operations carried out effectively, regulate the import and export of dangerous chemicals inspection program, the development of this standard.

The standard test used as the oxidant basic technical specifications, can guide the inspectors in accordance with the "on the import and export of dangerous chemicals and packaging inspection Regulatory Announcement inspection issues, "(2012 Announcement No. 30) requires the implementation of an oxidant dangerous chemicals inspection and supervision.

The basic contents of this standard to determine the standards can guide workers the right to establish a comprehensive inspection of hazardous chemicals in the study criteria Content and technical elements, so standards to systematic, scientific, applicability and operability requirements.

Inspection of import and export of dangerous chemicals Oxidant basic requirements Warning. Use of this standard should have relevant experience in inspection or testing. This standard does not point out all possible security asked question. Users are responsible for the use of appropriate safety and health practices and to ensure compliance with the conditions relevant national regulations.

1 Scope

This standard specifies the terms and definitions import and export of hazardous chemicals oxidants, requirements, testing, determination and disposal.

This standard applies to the import and export of hazardous chemicals oxidizer test (see Appendix oxidant List A), does not include the use of bulk transport Oxidant and pipeline transportation.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version suitable for use herein Member. For undated references, the latest edition (including any amendments) applies to this document.

GB/T 2828.1 Sampling procedures for inspection - Part 1. by acceptance quality limit (AQL) retrieval batch inspection sampling plan GB/T 6679 General rules for sampling solid chemicals GB/T 6680 General rules for sampling liquid chemicals GB 15258 rules for preparation of chemical safety labels SN/T 0370.3 export of dangerous goods packaging inspection procedures - Part 3. Identification SN/T 1828.3 and export of dangerous goods classification - Test methods - Part 3. oxidizing substances SN/T 3074.5 import and export of hazardous chemicals test specification - Part 5. oxidizers and organic peroxides SN/T 3221 import of dangerous chemicals inspection of packaging List of Hazardous Chemicals

(State Administration of Work Safety Notice No. 1 of 2003) About Recommendations on the Transport of Dangerous Goods Model Regulations (UN, 17th Edition) Transport of Dangerous Goods Recommendations Manual of Tests and Criteria (UN, 5th Edition) Globally Harmonized System of Classification and Labelling (UN, 4th Edition)

3 Terms and Definitions

The following terms and definitions apply to this document.

Oxidant oxidizing substances Itself is not necessarily combustible, may generally by yielding oxygen may cause or contribute to the combustion of other material substances.

Tag label

On an appropriate set of written, printed or graphic information elements of dangerous products, because the target is selected sectors related, they are attached to the or directly printed on the container dangerous product or its external packaging.

Safety Data Sheet safetydatasheets; SDS Provide comprehensive information on the substance or mixture for use in workplace chemical control regulatory frameworks. About as including ring
