Foreword

This standard was drafted in accordance with GB/T 1.1-2009 given rules.

This standard is proposed and managed by the National Certification and Accreditation Administration Committee.

This standard was drafted. Tianjin People's Republic of China Exit Inspection and Quarantine.

Introduction

With the social development and technological progress, increasing the risk of chemical species, which covers safety regulations has become even more widespread in the country now Has released the "List of Hazardous Chemicals" in (2002) there are more than 3800 kinds of different types of hazardous chemicals. Meanwhile, the United Nations "about the dangers of Recommendations on the Transport of goods, Model Regulations "and" Globally Harmonized System of Classification and Labelling "for transport of dangerous chemicals, packaging and labeling, etc.

There are also requirements, and hazardous chemical species given clearly defined. Bulk liquid hazardous chemicals and pipelines in the amount of dangerous chemicals Omo wide, including both crude oil and bulk class strategic commodities, including sulfuric acid and other corrosive liquids. The State Council in March 2011 released "Dangerous chemical safety regulations" (State Council Decree 591) defined the inspection and quarantine departments are responsible for the import and export of hazardous chemicals and packages Means for carrying out inspection. State Administration of Quality Supervision, Inspection and Quarantine February 29, 2012 "issued on the import and export of hazardous chemicals and their packaging Inspection and supervision issues related to notice "(No. 30, 2012 announcement) Article points out the import and export of hazardous chemicals and their packaging in accordance with national AQSIQ specify the technical specifications, the standard requires the implementation of inspection and supervision, inspection and quarantine to ensure the effective implementation of the relevant business,

regulate access Port of dangerous chemicals inspection program, the development of this standard.

The standards as bulk and liquid pipeline transportation of import and export of dangerous chemicals inspection of the basic technical specifications, can guide inspectors Accordance with the "import and export of dangerous chemicals and packaging inspection and regulatory issues related to notice" (2012 Announcement No. 30) requirements for import and export Bulk liquid hazardous chemicals and pipeline inspection and supervision of implementation.

The basic contents of this standard can be established to guide the development of specific standards development workers in the import and export of bulk liquid hazardous chemicals and pipeline inspection when establishing procedures and basic content elements of its technology standards, to make systematic, scientific, applicability and operability requirements to ensure Series of standards harmonization.

Inspection of import and export of dangerous chemicals Bulk and liquid pipelines basic requirements Warning. Use of this standard should have relevant experience in inspection work. This standard does not point out all possible security issues. Make with the responsibility of the appropriate safety and health practices and to ensure compliance with the conditions relevant national regulations.

1 Scope

This standard specifies the terms and definitions and the import and export of bulk liquid hazardous chemicals line, requirements, testing procedures, determination and disposal.

This standard applies to the use of bulk and pipeline transportation of liquid hazardous chemicals import and export inspection (see List of liquid hazardous chemicals attached Record A).
