What this standard covers

This standard specifies the object, test procedure and test results of the detection of *Bacillus anthracis* cross-primer thermostatic amplification method at the border port. This standard is applicable to the screening test of *Bacillus anthracis*, and the laboratory testing of *Bacillus anthracis* or suspected contamination by *Bacillus anthracis* at the border port.

Document data

International classification (ICS): 13.020.

Chinese classification (CCS): C62.

Estimated length of the Chinese original: 9,980 words.
