Foreword

This standard was drafted in accordance with GB/T 1.1-2009 given rules.

This standard is proposed and managed by the National Certification and Accreditation Administration Committee.

This standard by the People's Republic of China Shanghai Exit Inspection and Quarantine is responsible for drafting.

Participated in the drafting of this standard. People's Republic of China Hubei Exit Inspection and Quarantine, People's Republic of China Liaoning Entry-Exit Inspection and Quarantine Bureau.

Introduction

The standards used in the latest version of the relevant national standards, you can make this and other standards and national standards related to import and export electromechanical Product testing inspection and quarantine industry standard coherence.

This standard belongs to the industry standard of inspection and quarantine system on the third floor --- general categories, provides for the implementation of complete sets of equipment import and export inspection pass with test technical requirements. This standard is based on technology import and export inspection equipment, various types of equipment designed to make a detailed inspection test Personality under standard part of the technical provisions to help, guide and play a regulatory role, and in the absence of a suitable personality for such standard situations Test equipment to provide guidance.

The purpose of this standard is to test as much as possible the technical requirements of the import and export of complete sets of equipment within the respective ranges unanimously, to avoid depending on the standards required for testing.

This standard contains a variety of test equipment standard technical requirements are considered in all the basic requirements of content.

Applicable to a particular test equipment technical requirements of the standard basic requirement in the relevant technical requirements of the standard test equipment (Hereinafter referred to as. "Specific equipment standards") should be made clear, and this should mark the reference standard (in all types of test equipment standard technical requirements Test equipment for a particular technical requirements of the standard may not be specified basic requirements, so that the content may be omitted (when not applicable), or you can add some content (such as that the basic requirements in some cases not applicable), unless there is good reason, specific standard equipment Allowed contrary to the basic requirements.

Equipment Import and Export Inspection Technology Requirements General rule

1 Scope

This standard specifies the import and export of complete sets of equipment inspection and general technical requirements, given specific technical requirements for equipment inspection standard preparation Guide.

3.1 This standard applies to the definition of "equipment" test.
