Foreword

SN/T 3719 "Textile Industry Import and Export Inspection equipment technical requirements" is divided into two parts.

--- Part 1. chemical fiber equipment;

--- Part 2. wool textile equipment.

This section SN/T 3719 Part 2.

This standard was drafted in accordance with GB/T 1.1-2009 given rules.

Please note that some of the content of this document may involve patents. Release mechanism of the present document does not assume responsibility for the identification of these patents.

This standard is proposed and managed by the National Certification and Accreditation Administration Committee.

This standard by the People's Republic of China Shandong CIQ is responsible for drafting.

1 Scope

SN/T 3719 provisions of this part of the textile industry, import and export of complete sets of equipment in the wool textile equipment (hereinafter referred to as wool textile equipment) Technical inspection requirements.

This section applies to 3.1 defined test A wool textile equipment listed in Appendix, outside the above range can refer to wool textile equipment use.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version suitable for use herein Member. For undated references, the latest edition (including any amendments) applies to this document.

GB 23821-2009 Safety of machinery - Safety distances to prevent danger zones being reached on the lower limbs GB 12348 industrial enterprises of environmental noise emission standard plant boundary SN/T 3700-2013 Equipment Import and Export Inspection General technical requirements

3 Terms and Definitions

GB 23821-2009, GB 12348 and SN/T 3700-2013 and defined the following terms and definitions apply to this document.

Wool textile equipment worstedequipment Composed according to a certain process requirements, it can be produced, manufactured, processed or semi-finished wool fiber textiles professional equipment, and combinations thereof. This Some professional equipment, and combinations thereof with the overall process indicators, technical parameters, and (or) performance.

4.1 General requirements

It should comply with SN/T 3700-2013 4.1.

4.2.1 Mechanical safety requirements

4.2.1.1
wool textile machinery equipment safety requirements should be consistent with SN/T 3700-2013 4.2.2.

4.2.1.2
The machine should be running smoothly, oiled, no abnormal impact sounds.

4.2.1.3
Each box seal, no leakage pressure line.

4.2.1.4
syringe roving rubbing plate must wear, oil can be anti-static, not astringent, not sticky, does not allow a drum-shaped deformation and elongation.

4.2.1.5
scouring machine should be at least equal to 100mm immersion roller blade ends between
