Table of Contents

Foreword
1 Scope
2 Normative references
3 Terms and Definitions
4 Abbreviations
4.1 DNA. deoxyribonucleic acid (deoxyribonuleicacid)
4.2 DNTP. deoxynucleotide triphosphate (deoxyribonucleosidetriphosphate)
4.3 CTAB. cetyl trimethyl ammonium bromide (cetyltrithylammoniumbromide)
4.4 Tris. tris (hydroxymethyl) aminomethane [tris (hydroxymethyl) aminomethane]
4.5 EDTA. ethylene diamine tetra-acetic acid (ethylenediaminetetraaceticacid)
4.6 ExTaqHS. Efficient Hot Start DNA Polymerase
4.7 OD. optical density (opticaldensity)
5 Method summary

Foreword

SN/T 3730 "Identification of common food and feed livestock species" is divided into the following eight sections.

--- Part 1. mink component detecting real-time PCR method;

--- Part 2. Dogs component detecting real-time PCR method;

--- Part 3. Fox component detecting real-time PCR method;

--- Part 4. Donkey component detecting real-time PCR method;

--- Part 5. Horse component detecting real-time PCR method;

--- Part 6. cats component detecting real-time PCR method;

--- Part 7. Buffalo component detecting real-time PCR method;

--- Part 8. Pig component detecting real-time PCR method.

This section SN/T 3730 Part 6.

This section drafted in accordance with GB/T 1.1-2009 given rules.

This section proposed and managed by the National Certification and Accreditation Administration Committee.

This section drafted by. China Inspection and Quarantine Science Research Institute, People's Republic of China Liaoning Exit Inspection and Quarantine, the People's Republic of China Shanghai Exit Inspection and Quarantine and the State, Bao Biotechnology (Dalian) Co., Ltd.

1 Scope

SN/T 3730 provisions of this part of the cat food and feed ingredients identified in real-time PCR method.

This section applies to food and feed ingredients in cat qualitative detection.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version suitable for use herein Member. For undated references, the latest edition (including any amendments) applies to this document.

Laboratory use specifications and test methods GB/T 6682 Analysis GB/T 27403 laboratory quality control of food molecular biology standardized testing

3 Terms and Definitions

The following terms and definitions apply to this document.

Real-time fluorescence PCR realtimePCR Join fluorophore in the PCR reaction system, the use of real-time monitoring of the accumulation of the fluorescent signal of the PCR amplification process.

Ct values cyclethreshold when the number of cycles of each reaction tube fluorescent signal reaches the set value of the field experienced.

4 Abbreviations

The following abbreviations apply to this document.

5 Method summary

DNA samples were extracted, DNA as a template, respectively cats component specific detection primers and probes for real-time fluorescence PCR amplification
