1 Foreword

SN/T 3806-2014 was issued by General Administration of Customs on 13 January 2014 and has been in force since 1 August 2014.

The SN/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 8 pages in English translation.

2 Scope Preview

This standard specifies the import and export of carbon steel, alloy steel in ICP-AES determination of niobium, the boron, tungsten and zirconium.

SN/T 3806-2014 falls under ICS 77.140.01, in the field of metallurgy.

This catalogue holds 97 other SN/T standards in that field.

In this catalogue, SN/T standards carry edition years from 1991 to 2026.

3 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document.

GB/T 6682-2008 - Water for analytical laboratory use - Specification and test methods

GB/T 20066

4 About this standard

Issued by: General Administration of Customs

English translation: about 8 pages (approximate)

5 Related standards

Standards on related subjects:

GB/T 3654.3-2019 - Ferroniobium-Determination of silicon content-Gravimetric method

GB/T 4336-2016 - Carbon and low-alloy steel-Determination of multi-element contents-Spark discharge atomic emission spectrometric method (routine method)

GB/T 4701.1-2009 - Ferrotitanium - Determination of titanium content - The ammonium ferric sulfate titration method

SN/T 5570-2023 - Import and export ferroalloy classification testing

SN/T 4757-2017 - Determination of silicon??aluminium ??manganese??phosphorus??copper ??nickel??chromium ??titanium content in ferrovanadium for export. Inductively coupled plasma atomic emission spectrometric method

SN/T 4308-2015 - Determination of chromium, nickel, silicon, manganese, aluminium, phosphorus, tungsten, molybdenum, cobalt, vanadium content in alloy steel - Inductively coupled plasma atomic emission spectrometric method
