1 Foreword

SN/T 3974-2014 was issued by General Administration of Customs on 14 July 2014 and has been in force since 1 March 2015.

The SN/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 8 pages in English translation.

2 Scope Preview

This standard specifies the products after plating trace amounts of hexavalent chromium ion chromatographic method derived column. This standard applies to the determination of trace amounts of hexavalent chromium plating product content.

SN/T 3974-2014 falls under ICS 25.220.40, in the field of manufacturing engineering.

This catalogue holds 32 other SN/T standards in that field.

In this catalogue, SN/T standards carry edition years from 1991 to 2026.

4 About this standard

Issued by: General Administration of Customs

English translation: about 8 pages (approximate)

5 Related standards

Standards on related subjects:

GB/T 4955-2005 - Metallic coatings -- Measurement of coating thickness -- Coulometric method by anodic dissolution

GB/T 4957-2003 - Non-conductive coatings on non-magnetic basis metals -- Measurement of coating thickness -- Eddy current

GB/T 4956-2003 - Non-magnetic coatings on magnetic substrates -- Measurement of coating thickness -- Magnetic method

6 Classification and status

International classification (ICS): 25.220.40

Chinese Standard Classification (CCS): A 29

Prefix SN/T: recommended standard.
