Foreword

SN/T 3981 "Import and Export Textile Quality Compliance Evaluation Method Textile Raw Materials" is divided into 15 parts.

- Part 1. Cotton;
- Part 2. Cashmere;
- Part 3. Silkworm cognac;
- Part 4. Double Palace Silk;
- Part 5. Silk silk;
- Part 6. Tussah silk;
- Part 7. Silk-like twisted wire;
- Part 8. Wool;
- Part 9. Special animal hair;
- Part 10. Silk raw silk;
- Part 11. Hemp fiber;
- Part 12. Synthetic fibers;
- Part 13. rayon;
- Part 14. Regenerated fibres;
- Part 15. Other fibers.

This part is the 10th part of SN/T 3981.

This part is drafted in accordance with the rules given in GB/T 1.1-2009.

This part replaces SN/T 0516-2011 "Import and export of textile raw materials inspection regulations silkworm soil" and SN/T 1497.2-2005 the procedure for the inspection of the silk

and tube-mounted double palace silk.

Compared with SN/T 0516-2011 and SN/T 1497.2-2005, the main technical changes in this section are as follows.

- The standard name was revised to "Import and Export Quality Evaluation Method for Textiles and Textiles. Part 10. Silk-like Health wire";
- Range adjustment for the requirements, procedures and evaluation report content of the import and export raw silk conformity assessment;
- Modified the content of the term part;
- Adjusted the original standard format and normative reference documents;
- Increased the requirements for compliance evaluation;
- Revised the judgment requirements of the results of the conformity assessment;
- Added information appendix A China raw silk standard list, informative appendix B import and export raw silk quality conformity evaluation report format.

This part is proposed and managed by the National Certification and Accreditation Administration.

This section drafted by. Sichuan Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China, Zhejiang Entry-Exit Inspection and Quarantine Bureau, Anhui Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China, Guangxi Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China.

1 Scope

This part of SN/T 3981 specifies the basic requirements, procedures, contents, methods and results of the conformity assessment of raw and imported raw silk.

Set and report methods.

This section applies to the quality conformity assessment of the import and export raw silk regulatory requirements and non-regulatory requirements.

2 Normative references

The following documents are indispensable for the application of this document. For dated references, only dated versions apply to this article.

Pieces. For undated references, the latest edition (including all amendments) applies to this document.

SN/T 3702.2 Sampling methods for quality assessment of textiles for import and export - Part 2. Textile materials

3 Terms and definitions

The following terms and definitions apply to this document.

Raw silk

The silkworm cocoons are used as raw materials, and a plurality of filaments are entangled and twisted by mechanical means according to a certain silk-making process and quality requirements.

Regulatory requirements mandatory requirements the requirements specified in relevant laws, regulations, decrees, regulations, official gazettes, and compulsory standards.

Note: The requirements can be clearly stated in regulatory documents such as laws, regulations, statutes, and regulations. This section refers to some countries or regions.

And China's regulatory requirements for raw silk related technical projects. Including the input (out) countries (regions) and the Chinese government signed an intergovernmental agreement, the government all technical items specified in the agreement are considered mandatory requirements of the technical specifications.

Non-mandatory requirements the non-legal property generally refers to the technical requirements agreed by the relevant organizations, enterprises, and trade relations parties.

Note: In this section, it mainly refers to the illegality of some countries or regions (organizations) in terms of recommended standards, product safety statements, etc.

Regulatory requirements.

Conformity evaluation evaluation of conformity Systematic check to the extent that a product, process, or service meets specified requirements.

Note: This part refers specifically to the extent to which the technical indicators of import and export raw silk meet the specified requirements through systematic technical sampling, inspection and testing, that is, through technical testing.

Verification means to evaluate the extent to which the technical indicators of raw silk for import and export meet the requirements.
