What this standard covers

This standard specifies the glass and glass products boron content by inductively coupled plasma atomic emission spectrometry (ICP-AES) Determination. This standard applies to the determination of glass and glass products of boron. Measurement range: 0.001% to 3.0%.

Document data

International classification (ICS): 81.040.30.

Chinese classification (CCS): Y22.

Estimated length of the Chinese original: 8,849 words.
