Foreword

This standard was drafted in accordance with GB/T 1.1-2009 given rules.

This standard is proposed and managed by the National Certification and Accreditation Administration Committee.

This standard was drafted. People's Republic of China, Shenzhen CIQ, Shenzhen Inspection and Quarantine Science Research Institute.

Introduction

Gasoline is a special smell colorless to pale yellow transparent liquid. Methanol, gasoline refers to gasoline, methanol, additive by a certain percentage after Deployment of the mixture. Ethanol in gasoline means without methyl tert-butyl ether (MTBE), a dedicated gasoline oxygenate additive oil components, press Adding a certain percentage of the volume ratio of denatured fuel ethanol, mixed with fuel from the vehicle. The main purpose of petroleum products for the automotive and aviation fuel, Chemical solvents and chemical synthetic materials. Our gasoline main origin Jiangsu, Shandong, Guangdong and other major exporting country imports are Germany, Japan such as this.

United Nations "on the Recommendations on the Transport of Dangerous Goods Model Regulations" gasoline classified as Class 3 flammable liquid, UN No.

1203. Inhalation of gasoline vapors can cause headaches, dizziness, nausea, tachycardia, and so on. When the inhalation of vapors can cause severe central nervous by obstacles. Air concentration of 0.02% (volume fraction), the sensitive person with mild symptoms.

In March 2011 the State Council issued the "dangerous chemical safety regulations" [591 State Council Decree] provides for inspection and quarantine departments Responsible for the import and export of hazardous chemicals and their packaging implementation of the inspection. To ensure the effective implementation of the relevant inspection and quarantine operations, standardize import and export Dangerous chemicals and packaging inspection

and supervision work, the development of this standard.

Inspection of import and export of dangerous chemicals Petrol (gasoline containing methanol, ethanol, gasoline) Warning. Use of this standard should have the relevant inspection or testing work experience and relevant qualifications. This standard does not indicate all possible security issues. Users are responsible for the use of appropriate safety and health practices and to ensure compliance with relevant national regulations condition.

1 Scope

This standard specifies the import and export of gasoline (gasoline containing methanol, ethanol, gasoline) requirements, testing and conformity determination and disposal.

This standard applies to the import and export of gasoline (gasoline containing methanol, ethanol, gasoline) and their packaging inspection.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version suitable for use herein Member. For undated references, the latest edition (including any amendments) applies to this document.
