What this standard covers

This standard specifies the inductively coupled plasma Electronic and Electrical Products metal parts nickel-plated layer of lead and cadmium content of mass spectrometry methods. This standard applies to electrical and electronic products metal parts nickel-plated layer of lead, cadmium determination, other base metals nickel plating layer can also refer to use.

Document data

International classification (ICS): 31.020.

Chinese classification (CCS): L04.

Estimated length of the Chinese original: 7,792 words.
