### What this standard covers

This standard specifies the frontier ports A, B influenza virus, parainfluenza virus ??, ??, ?? type, a total of seven kinds of microplate microarray detection of respiratory viral respiratory syncytial virus, and adenovirus. This standard applies to border crossings in the laboratory using a microplate gene chip technology to the seven respiratory viruses were detected.

### Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C62.

Estimated length of the Chinese original: 9,929 words.
