What this standard covers

This standard specifies test methods and classification criteria for chemically unstable gas and gas mixtures. This standard applies to the determination and classification of a chemically unstable gas in an additional sub-category of flammable gases in the United Nations Globally Harmonized System of Classification and Labelling of Chemicals (GHS) (Revised 6). This standard does not apply to the determination of the decomposition of gases under process conditions in chemical plants and the hazardous reactions that may occur between gases in a gas mixture.

Document data

Chinese classification (CCS): G09.

Estimated length of the Chinese original: 10,110 words.
