What this standard covers

This standard specifies the liquid chromatography-mass spectrometry (HPLC-MS/MS) method for the determination of methicillin residues in imported and exported food animals such as pigs, cattle, sheep, chickens, ducks and geese. This standard applies to the blood of pigs, cattle, sheep, chickens, ducks, geese and the determination of the residual amount of emamectin in the urine of pigs, cattle and sheep. This standard applies to entry and exit inspection and quarantine work.

Document data

Chinese classification (CCS): X22.

Estimated length of the Chinese original: 9,979 words.
