What this standard covers

This standard specifies general provisions, classifications, approvals, pre-operational safety inspections, work-in-progress monitoring and completion confirmation for thermal (hot) operations in offshore oil installations. This standard applies to thermal (hot) work in the process of production, maintenance, alteration and expansion of oil installations in the internal waters, territorial sea, contiguous zone, exclusive economic zone, continental shelf and other sea areas under the jurisdiction of the People's Republic of China.. In the process of production, maintenance, alteration and expansion of petroleum facilities in inland waters, thermal (hot) operations may be carried out in accordance with this standard.
