What this standard covers

This standard specifies the basic requirements for the selection, design, manufacture, inspection and installation of insulating joints and insulating flanges for electrochemical protection in buried steel pipelines. This standard applies to the dielectric temperature does not exceed 100°C, the design pressure does not exceed 32MPa, nominal diameter does not exceed DN2000 insulation joints and design pressure does not exceed 10MPa, nominal diameter does not exceed DN600 insulation flange.

Document data

International classification (ICS): 75.180.

Chinese classification (CCS): E93.

Estimated length of the Chinese original: 20,231 words.

Supersedes the earlier edition SY/T 0516-2008.
