What this standard covers

This standard specifies the use microscopic observation with a hot stage (hereinafter referred to as hot stage) and video surveillance systems polarizing microscope, microscopic observation point waxy crude oil wax precipitation method. This standard applies to the determination of moisture content of not more than 0. 5% (mass fraction), wax content of not less than 3% (mass fraction) of crude oil wax crystallization point.

Document data

International classification (ICS): 75.040.

Chinese classification (CCS): E21.

Estimated length of the Chinese original: 6,682 words.

Supersedes the earlier edition SY/T 0521-1993.
