What this standard covers

This standard specifies the design, manufacture and testing of offshore cranes. Offshore cranes are usually installed on fixed platforms (with fixed foundations) or floating platform structures for drilling and oilfield production operations. This standard does not apply to the design, manufacture and testing of hangers and/or emergency escape devices, nor does it apply to the design, manufacture and testing of ship cranes or heavy-duty cranes.

Document data

International classification (ICS): 75.180.10.

Chinese classification (CCS): E94.

Estimated length of the Chinese original: 73,712 words.

Adopted international standard: API Spec 2C-2004, IDT.

Supersedes the earlier edition SY/T 10003-1996.
