What this standard covers

This standard specifies the minimum requirements for performance, design, materials, welding, testing, inspection, storage and transportation of throttling and killing systems. This standard applies to ground and subsea throttling and killing system equipment that is safe and functionally interchangeable for drilling oil and gas wells. This standard applies to the design and manufacture of the following equipment: 1. Articulated throttling and killing pipelines (fighting manifolds). 2. The header (buffer tank). 3, throttling and killing pipe summary. 4, drilling throttle valve driver. 5, drilling throttle controller. 6, drilling throttle valve. 7. Flexible throttling and killing pipelines. 8. Throttle joints for throttling and killing assembly. 8. Rigid throttling and killing pipelines. 9. Rotary unions for throttling and killing equipment. 10. Hydraulic throttle manifold control box. This standard does not apply to throttling and killing manifolds

Document data

International classification (ICS): 75.180.10.

Chinese classification (CCS): E92.

Estimated length of the Chinese original: 103,131 words.

Adopted international standard: API Spec 16C-2015, MOD.

Supersedes the earlier edition SY/T 5323-2004.
