What this standard covers

This standard specifies the method of radionuclide tracer logging carrier construction process methods, processes and logging data entry requirements. This standard applies to field measurements of radioactive tracer injection profile injection wells and production wells and injection wells to find channeling, looking for leakage. Radioactive tracer logging evaluation fracturing and sealing effect can also refer to the use.

Document data

International classification (ICS): 75.020.

Chinese classification (CCS): E12.

Estimated length of the Chinese original: 10,161 words.

Supersedes the earlier edition SY/T 5327-1999.
