What this standard covers

This standard specifies the principles for the division of primary, secondary and tertiary tectonic units in petroleum-bearing basins. This standard is applicable to the tectonic unit division of oil and gas basins with depressive structure, depressive structure, foreland structure and craton-like structure. For superimposed oil and gas basins, the basal structure of the basin structure and the exploration target layer can be taken into account.

Document data

International classification (ICS): 75.010.

Chinese classification (CCS): E11.

Estimated length of the Chinese original: 8,856 words.

Supersedes the earlier edition SY/T 5978-1994.
