What this standard covers

This standard specifies the basic safety requirements for the design, construction and acceptance of natural gas injection systems for onshore oil and gas fields, selection requirements for gas injection wells, technical indicators for injection of natural gas, operation operations, inspection and maintenance operations, safety management and emergency management. This standard is applicable to natural gas injection operations for the purpose of pressure-holding mining in onshore oil and gas fields.

Document data

International classification (ICS): 13.100.

Chinese classification (CCS): E09.

Estimated length of the Chinese original: 10,129 words.

Supersedes the earlier edition SY/T 6561-2011.
