What this standard covers

This standard specifies the fields of petroleum logging compensated density logging tool and behavior scale density logging instrument's calibration method for using the method to determine the density of spine and ribs figure fitting method used to determine the density log photoelectric absorption coefficient The calibration instrument calibration.

Document data

International classification (ICS): 75.010.

Chinese classification (CCS): E91.

Estimated length of the Chinese original: 23,296 words.
