What this standard covers

This standard specifies the Coriolis flowmeter for custody transfer metering using a method. These include: Coriolis flowmeters for operation standards or procedures, Coriolis flowmeter installation, operation and maintenance of law and the volumetric method with mass flowmeter verification Keliaoke content. This standard applies to the oil industry for dynamic measurement of liquid hydrocarbon flow in all aspects. This standard does not restrict the Coriolis flowmeter used for other purposes or used to measure other fluids.

Document data

International classification (ICS): 75.180.30.

Chinese classification (CCS): E98.

Estimated length of the Chinese original: 31,341 words.

Adopted international standard: API MPMS 5.6-2002, NEQ.
